***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species of the claimed invention:
  - (a) a radial tire construction having a first, axially inner ply that encompasses a bead wedge insert and extends radially above a bead core and a second, axially outer ply that engages the radially inner end of said bead wedge insert (Figure 1)
  - (b) a radial tire construction having a first, axially inner ply that encompasses a bead wedge insert and extends radially above a bead core and a second, axially outer ply that is not turned around the bead and terminates at approximately the radial height of the bead core (Figure 2)
  - (c) a radial tire construction having a first, axially outer ply that encompasses a bead wedge insert and extends radially above a bead core and a second, axially inner ply that is not turned around the bead and terminates at approximately the radial height of the bead core (Figure 3)
  - (d) a radial tire construction having a first, axially inner reinforcing ply and a second, axially outer reinforcing ply, each of which has a turnup portion that is folded upon itself (Figure 4)
  - (e) a radial tire construction having a single reinforcing ply that encompasses a bead wedge insert and terminates in the shoulder region (Figure 5)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims to all of the species.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. A telephone call was made to Martin Farrell on June 4, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

### ***Conclusion***

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Justin R Fischer** whose telephone number is (703) 605-4397. The examiner can normally be reached on M-F (7:30-4:00).
